

Reading in Context

A word and its paragraph

After a long walk, we sat on the bank of the river and watched the water flow past the old bridge. Here, the surrounding sentence helps a reader understand what bank means.

A different meaning

On Monday, I visited the bank to open a savings account. The word is the same, but the paragraph describes a different place and a different action.

Reading technical material

An AbortController can cancel a pending request. A Promise represents the eventual completion or failure of an asynchronous operation. Preserve these names so readers can connect the translation with the original documentation.
